Thin Solid Films, *149* (1987) 394–396

Contents of Vol. 149

ELECTRONICS AND OPTICS

Study of the gap states in vacuum-deposited Zn_3P_2 Schottky barriers using admittance spectroscopy 1
V. J. Rao, V. Samuel, N. B. S. Nageswara Rao and A. P. B. Sinha (Poona, India)

Effect of chlorine on the electrophotographic properties of Se–Te alloy 9
A. Onozuka, O. Oda and I. Tsuboya (Saitama, Japan)

Electrical resistivity and lattice parameters of sputtered iridium alloys 17
E. Selbach (Jülich, F.R.G.), H. Jacques, K. Eiermann (Hanau, F.R.G.), B. Lengeler and W. Schilling (Jülich, F.R.G.)

On the role of indium underlays in the prevention of thermal grooving in thin gold films 29
S. Y. Lee, R. E. Hummel and R. T. Dehoff (Gainesville, FL, U.S.A.)

METALLURGICAL AND PROTECTIVE COATINGS

X-ray analysis of strain in titanium nitride layers 49
V. Valvoda and J. Musil (Prague, Czechoslovakia)

PREPARATION AND CHARACTERIZATION

Influence of the substrate temperature on the properties of $MoSi_2$ thin films 61
W. Bretschneider and G. Beddies (Karl-Marx-Stadt, G.D.R.)

Chemical deposition of ZnO films 65
M. Ristov, Gj. Sinadinovski, I. Grozdanov and M. Mitreski (Skopje, Yugoslavia)

Radiation damage effects in GaAs transmission electron microscopy specimens prepared by ion milling 73
D. G. Ivey and G. R. Piercy (Hamilton, Canada)

Stability of plasma-deposited SiO_2 films evaluated using stress and IR measurements 85
H. Gokan, A. Morimoto and M. Murahata (Kawasaki, Japan)

The effect of substrate steel on the chemical vapour deposition of TiC onto tool steels 95
D. H. Jang and J. S. Chun (Seoul, South Korea)

GENERAL FILM BEHAVIOUR

Aluminized polyester films: influence of substrate on metal texture 105
D. J. Brown (Cambridge, U.K.)

A universal model for the nucleation of gold on NaCl 113
A. D. Gates and J. L. Robins (Nedlands, Australia)

LETTERS

Influence of the substrate on the crystallization kinetics of vapour-deposited amorphous selenium films. L73
A. Muñoz, F. L. Cumbrera, A. Conde and R. Márquez (Seville, Spain)

Compressive stress of thin cubic BN films prepared by r.f. reactive sputtering on r.f.-biased substrates L77
B. Goranchev, K. Schmidt and K. Reichelt (Jülich, F.R.G.)

ELECTRONICS AND OPTICS

Electrical and optical properties of phthalocyanine films 129
H. Laurs and G. Heiland (Aachen, F.R.G.)

Current–voltage spectra of metal/oxide/SnTe diodes
I: Experiments 143
T. Stoeckel and H. Finkenrath (Darmstadt, F.R.G.)

II: Analysis 149
A. A. Cottey (Norwich, U.K.), R. Enders, H. Finkenrath, T. Stoeckel and N. Uhle (Darmstadt, F.R.G.)

Photoelectric properties of substituted silicon phthalocyanine Langmuir–Blodgett film Schottky barrier and metal/insulator/semiconductor devices 163
Y. L. Hua, M. C. Petty, G. G. Roberts, M. M. Ahmad (Durham, U.K.), M. Hanack and M. Rein (Tübingen, F.R.G.)

METALLURGICAL AND PROTECTIVE COATINGS

Acid corrosion behaviour of amorphous and crystalline $Ti_{75}Ni_{20}Si_5$ alloys 171
H. Bala (Częstochowa, Poland) and S. Szymura (Gliwice, Poland)

Diffusion model for an inhomogeneous medium. 177
A. Feygenson (Reading, PA, U.S.A.) and J. N. Zemel (Philadelphia, PA, U.S.A.)

Rapid thermal anneal of arsenic implanted into Si(100) and Si(111) 189
A. Feygenson (Reading, PA, U.S.A.) and J. N. Zemel (Philadelphia, PA, U.S.A.)

PREPARATION AND CHARACTERIZATION

SnSe thin films synthesized by solid state reactions 197
D. T. Quan (Rennes, France)

Molecular beam epitaxy of InAs/$Sr_{1-x}Ba_xF_2$/InAs structures 205
K. Sugiyama (Mie, Japan)

Sputtering of Mo–Si layers from composite targets 211
G. Lippert (Frankfurt an der Oder, G.D.R.), M. Procop (Berlin, G.D.R.), W. Borchardt (Frankfurt an der Oder, G.D.R.), L. Spieß (Ilmenau, G.D.R.) and P. Urwank (Dresden, G.D.R.)

GENERAL FILM BEHAVIOUR

Stopping power measurements for megaelectronvolt $^4He^+$ ions via thin films of metals and binary metal alloys. 219
M. A. Harith, W. H. Osman, N. S. Gaafar and L. M. El-Nadi (Cairo, Egypt)

Transport of evaporated materials through support gas in conjuction with ion plating: I 225
A. Bessaudou, J. Machet and C. Weissmantel (Limoges, France)

Transport of evaporated material through support gas in conjunction with ion plating: II 237
A. Bessaudou, J. Machet and C. Weissmantel (Limoges, France)

Fundamental and practical aspects of alloying encapsulated gold-based contacts to GaAs. 251
A. J. Barcz, E. Kamińska and A. Piotrowska (Warsaw, Poland)

ELECTRONICS AND OPTICS

The influence of a spatially non-homogeneous trap distribution on the transient currents in insulating layers at high fields 261
J. Rybicki and M. Chybicki (Gdańsk, Poland)

The formation of titanium, chromium, niobium and zirconium aluminides in thin films for interconnections. 269
R. K. Ball and A. G. Todd (Wembley, U.K.)

Photovoltaic junctions between indium tin oxide and silicon. 283
S. Amirhagi, M. Mudrik, A. Ulman, Z. Harzion and N. Croitoru (Ramat Aviv, Israel)

PREPARATION AND CHARACTERIZATION

Properties of tin oxide films prepared by reactive electron beam evaporation 291
R. Banerjee and D. Das (Calcutta, India)

Structure of sputtered Ni_2P films. 303
F. Schrey, T. Boone, S. Nakahara, M. Robbins and A. Appelbaum (Murray Hill, NJ, U.S.A.)

Sulfuration assistée par plasma de InP 313
M. Gendry, J. Durand, L. Cot (Montpellier, France) and G. Hollinger (Villeurbanne, France)

The structure and composition of Te/CdS thin film diodes 325
A. G. Fitzgerald (Dundee, U.K.)

The influence of preparation parameters on the deposition rate, density and optical properties of thin hydrogenated amorphous silicon films prepared by r.f. glow discharge 331
G. Myburg and R. Swanepoel (Johannesburg, South Africa)

Plasma-polymerized electron beam resists prepared from methyl methacrylate using various carrier gases 341
S. A. Gangal, M. Hori, S. Morita and S. Hattori (Nagoya, Japan)

The role of preferred surface sites in the nucleation and growth of gold on sodium chloride
I: The influence of low energy electrons 351
B. F. Usher and J. L. Robins (Nedlands, Australia)

II: Reanalysis of two comprehensive studies. 363
B. F. Usher and J. L. Robins (Nedlands, Australia)

GENERAL FILM BEHAVIOUR

Low temperature NH_3 adsorption on clean amorphous silicon and on crystalline silicon surfaces and nitrogen bonding in hydrogenated amorphous silicon nitride films: a comparative X-ray photoelectron spectroscopy study. 385
L. Kubler, E. K. Hlil, D. Bolmont and J. C. Peruchetti (Mulhouse, France)

LETTERS

A solution growth technique for the deposition of cobalt selenide thin film. L81
P. Pramanik, S. Bhattacharya and P. K. Basu (Kharagpur, India)

Photoinduced effect on the phase transition in Ag_3VO_4 thin films L85
T. Hirono, H. Koizumi, T. Yamada (Tokyo, Japan) and T. Nishi (Ibaraki, Japan)

AUTHOR INDEX 393
